## ALLOGRAFT BONE

Mineralized Cortical-Cancellous mix / Cortical / Cancellous.  
Dem mineralized Cortical-Cancellous mix / Cortical.

### RECOMMENDED USES:

- Implant placement grafting
- Sinus elevation and grafting
- Ridge augmentation and preservation
- Periodontal deficiencies and irregularities
- Extraction site preservation and conservation

### ADVANTAGES:

- 100% bone
- FDA registered and accredited by AATB
- Available in many sizes to treat a wide range of bone defects
- Easy to use screw top jar
- 5 year expiration date

## HEMOSTATIC GAUZE

Puncture foil backing  
and remove one piece  
of pre-cut backing

Place BioViva onto the  
wound or extraction  
site with forceps

Within 15 seconds,  
BioViva becomes  
viscous

- Innovative soluble, sterile material made from regenerated cellulose
- Upon contact with blood or fluid, rapidly transforms into viscous gel, sealing wound voids and promoting clotting
- Efficient and cost effective
- User-friendly, stays in place after packing
- 100% natural. Derived from plants

## SURGICAL SUTURES

### SILK SUTURES

- AISI 300 stainless steel, super fine needles
- 2 year tensile strength retention rating
- High knot comfort and security

### CHROMIC/PLAIN GUT SUTURES

- Absorbable, sterile
- High quality raw material with exceptional needle precision
- Consistent uniform diameter and flexibility ensures secure knotting and ease of use
- Reliable and predictable absorption
- Incredibly high tensile strength
