## Hemostatic Gauze Dressing

#BHG

- Individually packaged, sterile, soluble, cellulose-based, bacteriostatic hemostatic gauze dressing
- Made from oxidized, regenerated cellulose derived from plants
- Absorbs blood and immediately transforms into a viscous gel
- Seals the extraction site, filling wound voids, and activates the clotting system to assist the body to stop bleeding

## Chromic Gut, Plain Gut, & Silk Sutures

- AISI 300 Stainless Steel needles are used for improved needle integrity, sharpness, insertion smoothness, and patient comfort
- Consistent uniform diameter and flexibility to ensure secure knotting and ease of use
- High quality raw material with exception needle precision
- Incredibly high tensile strength
- Gut sutures are absorbable, while the Silk sutures are non-absorbable
